

Project Development (SYP)

Peter Bauer

Unit 1

How the customer explained it

How the project leader understood it

How the analyst designed it

How the programmer wrote it

What the beta testers received

How the business consultant described it

How the project was documented

What operations installed

How the customer was billed

How it was supported

What marketing advertised

When it was delivered

What the customer really needed

What the digg effect can do to your site

The disaster recover plan

What the customer really needed

What the digg effect can do to your site

The disaster recover plan

Let's Talk Content – 1

Content

- ❖ What are projects?
- ❖ Project start
- ❖ Project Communication
- ❖ Software Development Process Models
- ❖ System Specification
- ❖ Implementation
- ❖ Testing
- ❖ Releasing / Deployment

What Are Projects?

- ❖ Collaborative enterprise
- ❖ Carefully planned
- ❖ Temporary rather than permanent
- ❖ Accomplish particular tasks
- ❖ Time constraints

Project Start

- ❖ Give basis for the management decision of project approval
- ❖ Describes
 - ❖ Necessity of project
 - ❖ Feasibility of project
 - ❖ Affordability of project
 - ❖ Market and economic effect of project

Project Communication

- ❖ Project Organization
- ❖ Requirements Management
- ❖ Project Planning
- ❖ Configuration Management
- ❖ Quality Assurance
- ❖ Methods and Tools

Software Development Process Models

- ❖ Waterfall model
- ❖ V-Model
- ❖ RUP
- ❖ Scrum
- ❖ Development Process Assessments

Administrivia

What Will We Do?

- ❖ Start developing a serious background in project development
- ❖ Learn basic project management skills
 - ❖ Documents beyond source code: Project Proposal, System Specification, UML Diagrams
 - ❖ Tools: Version Control, Virtualization, Deployment
 - ❖ Planning and monitoring

How Is The Course Organized?

- ❖ Theoretical background
 - ❖ Selected parts of the book
- ❖ Practical exercises
 - ❖ By means of smaller examples

How To Get A Grade – Main Contributions

- ❖ One test per semester
 - ❖ Date: 14. Jänner 2027
- ❖ Review of project deliverables
 - ❖ Project proposal
 - ❖ System Specification
 - ❖ Product Burndown
 - ❖ Prototypes

Projects

- ❖ Small projects (a content-driven website)
- ❖ 2 to 3 persons max.
- ❖ Find a topic

Let's Talk Content – 2

System Specification

- ❖ Analysis of the application domain
 - ❖ UML
- ❖ Documentation of functional and non-functional requirements
- ❖ Software architecture - Client Server

Implementation

- ❖ Documentation of software design
 - ❖ UML
- ❖ Coding in a team
 - ❖ Syncing the code base between the team members
 - ❖ Collaborative coding models
- ❖ Spec-driven and agentic programming
- ❖ Test-driven development

Testing

- ❖ Test strategies
- ❖ Test plans
- ❖ Test protocols

Releasing/Deployment

- ❖ “It runs on my computer”
- ❖ Staging
- ❖ Releasing
- ❖ Production
- ❖ Virtualization
- ❖ Docker files
- ❖ Docker images
- ❖ Deployment
